DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-13, drawn to product, classified in class 219, subclass 121.82.
- II. Claims 14-20, drawn to product, classified in class 219, subclass 121.82.
- III. Claim 21, drawn to product, classified in class 219, subclass 121.78.
- IV. Claims 22 & 24, drawn to product, classified in class 219, subclass 121.83.
- V. Claim 23, drawn to product, classified in class 219, subclass 121.68.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because a slidable base plate is not required for leveling. The subcombination has separate utility such as leveling device with more adjustability.

Inventions I or II and III or IV or V are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different

modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions a leveling device, an adjustable bat fixture, a positioning fixture and a positioning clamp.

Because these inventions are distinct for the reasons given above and the search required for one Group is not required for another Group, restriction for examination purposes as indicated is proper.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
